Naredba o zrakoplovnoj sigurnosti Air Safety Order

Dodatno osposobljavanje osoblja subjekata obuhvaćenih Uredbom Komisije (EU) br. 73/2010. o utvrđivanju zahtjeva o kvaliteti zrakoplovnih podataka i zrakoplovnih informacija za jedinstveno europsko nebo

Naredba o zrakoplovnoj sigurnosti: ASO-2014-002

| Broj revizije: 1 / 07.12.2020.

Inicirana od: Hrvatske agencije za civilno zrakoplovstvo (u daljem tekstu: Agencija)

1. Referentni propisi:

- a) Uredba Komisije (EU) br. 73/2010 od 26. siječnja 2010. o utvrđivanju zahtjeva o kvaliteti zrakoplovnih podataka i zrakoplovnih informacija za jedinstveno europsko nebo, kako je zadnje izmijenjena i dopunjena;
- b) ICAO Aneks 15;
- c) Zakon o zračnom prometu (Narodne novine br. 69/09, 84/11, 54/13, 127/13, 92/14);
- d) Pravilnik o aerodromima (Narodne novine br. 100/19);
- e) Zakon o obavljanju geodetske djelatnosti (Narodne novine br. 25/18).

2. Referentne smjernice:

- a) ICAO Doc 8126 Aeronautical Information Services Manual;
- b) EUROCONTROL Specification for the Electronic Aeronautical Information Publication (eAIP);
- c) EUROCONTROL Specification for Data Assurance Levels (DAL);
- d) EUROCONTROL Specification for Data Quality Requirements (DQR);
- e) EUROCONTROL Specification for the Origination of Aeronautical Data (DO);
- f) EUROCONTROL Specification for Aeronautical Information Exchange (AIX);
- g) EUROCONTROL Guidelines - Use of AIXM 5.1 in relation to the AIX Specification;
- h) EUROCONTROL ADQ Guide;
- i) EUROCONTROL Terrain and Obstacle Data Manual.

Additional training of personnel of the entities covered by Commission Regulation (EU) no. 73/2010 laying down requirements on the quality of aeronautical data and aeronautical information for the single European sky

Air Safety Order: ASO-2014-002

Revision No.: 1 / 07.12.2020.

Initiated by: Croatian Civil Aviation Agency (hereinafter: the Agency)

1. Regulation Reference:

- a) Commission Regulation (EU) No 73/2010 of 26 January 2010 laying down requirements on the quality of aeronautical data and aeronautical information for the single European sky, as last amended;
- b) ICAO Annex 15;
- c) Air Traffic Act (Official Gazette No. 69/09, 84/11, 54/13, 127/13, 92/14);
- d) Ordinance on Aerodromes (Official Gazette No. 100/19);
- e) Geodetic Activities Act (Official Gazette No. 25/18).

2. Guidance Material Reference:

- a) ICAO Doc 8126 Aeronautical Information Services Manual;
- b) EUROCONTROL Specification for the Electronic Aeronautical Information Publication (eAIP);
- c) EUROCONTROL Specification for Data Assurance Levels (DAL);
- d) EUROCONTROL Specification for Data Quality Requirements (DQR);
- e) EUROCONTROL Specification for the Origination of Aeronautical Data (DO);
- f) EUROCONTROL Specification for Aeronautical Information Exchange (AIX);
- g) EUROCONTROL Guidelines - Use of AIXM 5.1 in relation to the AIX Specification;
- h) EUROCONTROL ADQ Guide;
- i) EUROCONTROL Terrain and Obstacle Data Manual.

3. Područje primjene

Ova Naredba o zrakoplovnoj sigurnosti primjenjuje se na subjekte iz članka 2 stavak 2. c) Uredbe Komisije (EU) 73/2010.

Polaznici osposobljavanja su ovlašteni inženjeri geodezije (članovi Hrvatske komore ovlaštenih inženjera geodezije) koji stručne geodetske poslove obavljaju samostalno u uredu ovlaštenog inženjera geodezije, u zajedničkom geodetskom uredu ili kao zaposlenici u pravnoj osobi registriranoj za obavljanje stručnih geodetskih poslova (sukladno Zakonu o obavljanju geodetske djelatnosti, Narodne novine br. 25/18). Osobe koje će proći osposobljavanje sukladno nastavnom planu trebat će dokazati razumijevanje te usvajanje znanja iz prezentiranog nastavnog materijala putem pismenog ispita nakon kojeg će u slučaju pozitivnog ishoda biti izdana Svjedodžba (Certificate of Achievement). Rezultati testova polaznika bit će pohranjeni u arhivi Hrvatske agencije za civilno zrakoplovstvo, a evidenciju o ovlaštenim inženjerima geodezije kojima je izdana Svjedodžba (Certificate of Achievement) vodit će Hrvatska komora ovlaštenih inženjera geodezije u suradnji s Hrvatskom agencijom za civilno zrakoplovstvo.

Navedena Svjedodžba bit će jedan od uvjeta za javljanje na buduće natječaje na kojima će se birati ponude za izmjere zrakoplovnih podataka u zrakoplovstvu.

4. Cilj osposobljavanja

4.1 Uvod u osnovni regulatorni okvir civilnog zrakoplovstva (međunarodno, EU i nacionalno zakonodavstvo)

Upoznavanje s važećim propisima i standardima u području pružanja usluga zrakoplovnog informiranja (ICAO Aneks 15, propisi EU i nacionalno zakonodavstvo).

Razumijevanje Uredbe br. 73/2010, s dodatnim pregledom Direktive 2007/2/EC Europskog Parlamenta i Vijeća od 14. ožujka 2007. o uspostavljanju infrastrukture za prostorne informacije u Europskoj zajednici (INSPIRE), kako je zadnje izmijenjena i dopunjena.

4.2 Aerodromi

Upoznavanje s namjenom i fizičkim obilježjima osnovnih infrastrukturnih objekata aerodroma, sustavima instrumentalnog i vizualnog navođenja zrakoplova, oznakama, znakovima i sustavima rasvjete u prilazu aerodroma i na operativnoj površini, te zrakoplovnim podacima u svezi s njima.

Upoznavanje s površinama ograničenja aerodromskih prepreka i drugim ograničenjima i propisima koji se odnose na aerodromske prepreke.

Stvaranje svjesnosti o općem značaju zaštite civilnog zračnog prometa, upoznavanje s općim pravilima i mjerama zaštite civilnog zračnog prometa te poznавanje

3. Scope

This Aviation Safety Order applies to the entities referred to in Article 2, paragraph 2. (c) of Commission Regulation (EU) 73/2010. The participants of the training are chartered geodetic engineer (members of the Croatian Chamber of Chartered Geodetic Engineers), which may independently perform professional geodetic activities acting as a person in charge in the office of a chartered geodetic engineer, joint geodetic office and as an employee in a company registered for performing professional geodetic activities (according to Geodetic Activities Act, OG no. 25/18). Persons who shall undertake training in accordance with the syllabus will need to demonstrate an understanding and acquisition of knowledge from the presented teaching materials through a written exam after which in the case of a positive outcome will be issued a Certificate of Achievement. Results of tests of participants will be stored in the archives of the Croatian Civil Aviation Agency. The records of chartered geodetic engineer who has been issued a Certificate of Achievement will lead the Croatian Chamber of Chartered Geodetic Engineers in cooperation with the Croatian Civil Aviation Agency. Certificate of Achievement will be one of the conditions for application to future tenders for the selection of the data survey offers in aviation.

4. Training course aim

4.1 Introduction to the basic regulatory framework for civil aviation (international, EU and national legislation)

Familiarization with applicable regulations and standards in the field of Aeronautical Information Services (ICAO Annex 15, EU and national legislation).

Understanding Regulation 73/2010, with an additional review of the Directive 2007/2/EC of the European Parliament and of the Council of 14 March 2007 establishing an Infrastructure for Spatial Information in the European Community (INSPIRE), as last amended.

4.2 Aerodromes

Understanding the purpose and physical characteristics of basic infrastructure facilities at the aerodrome, instrument and visual docking guidance systems, markings, signs and lighting systems in the approach to the aerodrome and on the operational area, and aeronautical information related to them.

Understanding of obstacle limitation surfaces and other restrictions and regulations relating to the aerodrome obstacles.

Creating awareness about the general importance of the civil aviation security, getting to know the general rules and measures of civil aviation security and knowledge of the

pravila i zahtjeva koje moraju poštovati tijekom ulaska, kretanja i rada u pojedinim područjima zračne luke.

4.3 Geodetski podaci u civilnom zrakoplovstvu

Upoznavanje s dokumentima koji sadrže kriterije kvalitete geodetskih podataka posebnih namjena u zrakoplovstvu, a odnose se na rezoluciju, točnost i cjelovitost deklariranih, izmjerih i ili izračunanih podataka, na sadržaj geodetskog elaborata, specifikacije izmjera, potrebne certifikate ili izvještaje o ispravnosti za programe i uređaje za izmjeru, način zapisa i izlazni format podataka, standarde kvalitete te izradu metapodataka.

Upoznavanje s vrstama geodetskih podataka posebnih namjena u zrakoplovstvu, s matematičkom i fizičkom ovisnosti mjerjenja, s izjednačenjem mjerjenja, analizom kvalitete a priori i a posteriori, s položajnim i visinskim koordinatnim sustavima i transformacijama.

Upoznavanje s vrstama zrakoplovnih karata, osnovnim elementima zrakoplovnih karata, vrstama kartografskih projekcija, kontrolom transfera podataka i formatima podataka te normama i preporukama Aneksa 4 ICAO za zrakoplovnu kartografiju.

5. Metode osposobljavanja

Predavanje u učionici korištenjem računala i prezentacija izrađenih u programu MS Office PowerPoint ili putem webinara.

6. Nastavni plan

rules and requirements that must be adhered to during the entry, movement and work in certain aerodrome areas.

4.3 Geodetic data in civil aviation

Introduction to documents that contain geodetic data quality criteria for special purposes in aviation, in relation to the resolution, accuracy and integrity of declared, measured and/or calculated data, the content of a survey report, survey specifications, the required certificates or statements about the validity of measuring applications and devices, recording method and data output format, quality standards and the creation of metadata.

Understanding the types of geodetic data for special purposes in aviation, with mathematical and physical dependence of measurement, with adjustment of measurements, analysis of the quality a priori and a posteriori, the horizontal and vertical reference system and transformations. Introduction to types of aeronautical charts, the basic elements of aeronautical charts, types of map projections, data transfer control, data formats and Standards and Recommended Practices of the Annex 4 ICAO, Aeronautical Charts.

5. Training methods

Computer-equipped classroom' lectures and presentations produced in MS Office PowerPoint or through a webinar.

7. Organizacija osposobljavanja

Ospozobljavanje će za sve polaznike biti besplatno, a održavat će se po potrebi.

Pojedinosti provođenja postupka ospozobljavanja uredit će se između Hrvatske agencije za civilno zrakoplovstvo i Hrvatske komore ovlaštenih inženjera geodezije.

Termini i mjesto održavanja ospozobljavanja bit će objavljeni na web stranici Hrvatske agencije za civilno zrakoplovstvo (www.ccaa.hr), kao i na web stranici Hrvatske komore ovlaštenih inženjera geodezije (www.hkoig.hr).

8. Stupanje na snagu

Ona Naredba o zrakoplovnoj sigurnosti stupa na snagu s danom objave na web stranici Hrvatske agencije za civilno zrakoplovstvo.

Za Hrvatsku agenciju za civilno zrakoplovstvo:

Marin Puh, dipl.ing.

Direktor

7. Organisation of training

Training for all attendants will be free of charge and will be held as needed.

Details of the procedure for training shall be determined between the Croatian Civil Aviation Agency and the Croatian Chamber of Chartered Geodetic Engineers.

Training dates and place will be published on the website of Croatian Civil Aviation Agency (www.ccaa.hr), as well as on the website of the Croatian Chamber of Chartered Geodetic Engineers (www.hkoig.hr).

8. Entry into force

This Air Safety Order shall become effective upon publication on the website of the Croatian Civil Aviation Agency.

For Croatian Civil Aviation Agency:

Marin Puh, dipl.ing.

Director
